## LETTER OF TRANSMITTAL

October 29, 1928

DR. CHAS. O'H. LAUGHINGHOUSE,  
*Secretary-Treasurer and State Health Officer,  
State Board of Health,  
Raleigh, N. C.*

Dear Sir: I have the honor to submit, under the Vital Statistics Law, the annual report of births and deaths occurring in North Carolina during the year 1927, together with tables showing the total number of births and deaths by counties, with rate per 1,000 of population.

Respectfully submitted,

F. M. REGISTER,  
*Deputy State Registrar.*

*N. B. Two things we wish to call to the attention of the public:*

1—RATES—We are eight years away from the last census. Therefore, estimates of population on which rates are calculated are only provisional. In counties where emigration and immigration are practically equal, the rates are near one hundred per cent correct.

2—NON-RESIDENT DEATHS—Deaths of non-residents run the rates up in counties and cities that have hospitals and institutions that receive patients and inmates from beyond their borders. Very often in automobile accidents the injured die many miles from where the accident occurred, still they are charged to the place where the death occurred. Deaths from typhoid fever do not always occur where the disease was contracted.

There has not been found as yet any satisfactory way to tabulate non-resident deaths.
